

# SAN SERRIFFE

## Faces in focus

The Leader of the Opposition, Mr Ralph Bakerville, arriving at the National Assembly. Below, their late excellencies, Colonel Higuila and General Minion, who briefly held the office of President.

## The leader's rise to power

General Pica is essentially a family man, a quality reflected in his choice of Ministers. Profile by MARK ARNOLD-FOSTER.

FOR THE LAST 10 years San Serriffe has been a stable government, a good government, and a good country. This stability and success have been the result of the leadership of the President, Mr Pica. Born 20 years ago of poor but noble parents, Pica rose to power on the basis of his military and political skills. He was a general in the army, a minister in the cabinet, and a member of the National Assembly. His rise to power was a result of his military and political skills, and his family background.

## The block vote which resulted in industrial peace

JOHN TORODE discusses the rare degree of harmony between San Serriffe's trade unions and the multinational companies operating there.

THE establishment of the San Serriffe PTC in 1961 was the beginning of a new era in the country's industrial life. The PTC is a body which represents the interests of the industrial sector and the workers. It was established as a result of the industrial peace which has been achieved in the country. The PTC is a body which represents the interests of the industrial sector and the workers. It was established as a result of the industrial peace which has been achieved in the country.

# The People's Republic of Warrington extend joyous greetings to San Serriffe.

We the FREE peoples of the Republic of Warrington and supporters of VLADIVAR VODKA to San Serriffe SALUTE the people of San Serriffe on the occasion of their glorious independence day. Like you we have suffered the yoke of FOREIGN DOMINATION, EXPLOITATION of our vodka fields and PILLAGE of our factory girls alternate Sundays. Like you, a glorious world historical leader, ALEXEI RUNCORN, here the humble son of a farmer, arose to lead us from our chains into grand HEROIC oblivion. Like you, our people have overthrown FEUDAL torper to joyfully embrace the white hot flame of TECHNOLOGICAL sparks. Already the half-built spirit of the PEOPLE'S MUSEUM OF DIESEL TRANSPORT casts a welcome shadow over the future mansions of the Warrington antic-race. And the region where peasants once TOILED in the fields is now ENTIRELY given over to tractor sheds for tractor tractor drivers at the ALEXEI RUNCORN INSTITUTE OF TRACTORS. And like you, countless generations of our

ALEXEI RUNCORN  
Beloved Father of the People's Republic of Warrington.

forebears have taken on the mantle of wisdom and IDEOLOGICAL ENDEAVOUR by rigorously applying themselves to the glorious and cultural task of collectively drinking VLADIVAR VODKA. In this tradition, but HEROIC labour has reaped its FABULOUS HARVEST. So, dear brothers of San Serriffe, the mountains and valleys of Warrington ring out as our PEASANTS, abandoning their rusty shovels, raise their glasses to you. Salt money and fish restaurants alike come to an unseasoned halt as our WORKERS pause to toast your energetic and constructive well-being for the future. In every home and wedding-soup our wives and mothers join in spontaneous DEMONSTRATIONS of joy as they break out the so-called new REVOLUTIONARY measures of VLADIVAR VODKA. From humble betting shop to distant border post, from cradle tower to market bazaar, from presidential seat to half-battered supermarket, WARRINGTON SALUTES YOU FROM EVERY CORNER OF OUR REPUBLIC, SALOON, AND LOUNGE BARS.

# COSTAIN IS CHANGING THE FACE OF SAN SERRIFFE.

The Costain Group is building a new harbour for His Excellency General Pica on the east coast of San Serriffe. A new type of building technique using dock blocks, is being used to build a two level sea wall 0.9L8 units thick on both the Upper and Lower Cases. The kern of the wall is ranged so that its points break up the wave motion of the sea whilst allowing the water to flow through. The confidence of the General is well justified as the project will be going to bed three months ahead of schedule.

THE EXTRAORDINARY San Serriffe Island was discovered by Sir Charles Serriffe in 1850, during an expedition to the Indian Ocean in the sailing ship "The Phoenix". It was first named "San Serriffe" in a book by the author, published in 1851. The island was rediscovered in 1950 by the late Sir Charles Serriffe, who was the first to set up a permanent station on the island. The island is now a nature reserve and is home to many rare and unusual plants and animals. It is also a popular destination for tourists who are interested in the island's history and natural beauty.

THE BUREAU OF DEVELOPMENT, A San Serriffe agency for raising revenue from the factory gate, is headed by David Hooper.

## Casting off into unknown wealth

The industrial revolution that has engulfed the tiny Republic within the past ten years may soon result in its challenging the economic power of the West. Victor Keegan, Business Editor, reports.

San Serriffe is leading world-wide interest as an example of a developing country trying to take hold of its destiny in a large and complex world.

When all was first said and done, the San Serriffe government had to turn to the United Nations to secure its traditional resources and to explore its economic potential. When the United Nations completed its study in 1970, it found that the country was rich in natural resources and that the San Serriffe government should take advantage of them.

General Piro's industrial revolution has been a success in many respects. It has brought the country to the forefront of the industrial revolution in the world. It has also brought the country to the forefront of the economic revolution in the world.

get to the far shore of what was then the San Serriffe Republic. He visited the country in 1969. He visited the gold pits and the mining operations. He visited the copper pits and the mining operations. He visited the iron pits and the mining operations.

San Serriffe is producing an estimated 100,000 tons of gold a year. It is producing an estimated 100,000 tons of copper a year. It is producing an estimated 100,000 tons of iron a year. It is producing an estimated 100,000 tons of silver a year.
